

KaVo Everest® portal.

Have your restoration done ...

The Everest Portal is a network that ensures an exchange of 3D-construction data and therefore acts as an interactive "exchange-platform" for several scan and milling partners.

What are the advantages for the portal?

You have got the software ... the portal gives you the optimal manufacturing solution!

- Free choice of an Everest milling laboratory
- Use of a large material variety
- Inexpensive entrance – low investment costs
- Interactive exchange platform
- Connects Everest users worldwide
- Extended network capability
- Increase the profitability of Everest laboratories

Data could be sent to cooperative partners by the portal additionally. Open Architecture of the Everest system expands for new technologies can be created.

Which conditions are necessary for the Everest portal?

- Everest Scan Pro, Everest Scan II, 3shape Scanner
- high speed internet
- latest software version
- Windows XP

You will find the portal software on www.kavo-everest.com for downloading.

How does the portal work?

- The milling laboratory sends a manufacturing request into the KaVo Everest portal
- The Everest scan laboratory is now able to see all registered milling partners within the portal which have free capacities available. Hence the laboratory can choose a suitable partner.
- After accepting the offer construction data will be transferred securely and without complications to the milling partner by the Everest portal (a KaVo server).
- The milling laboratory manufactures the order and sends it back to the scan laboratory.
- Writing and payment of the invoice take place directly between the milling and the scanning laboratory.
- There is also the production centre BEGO Medical in the portal, available for the manufacturing of laser-sintered NEM work.

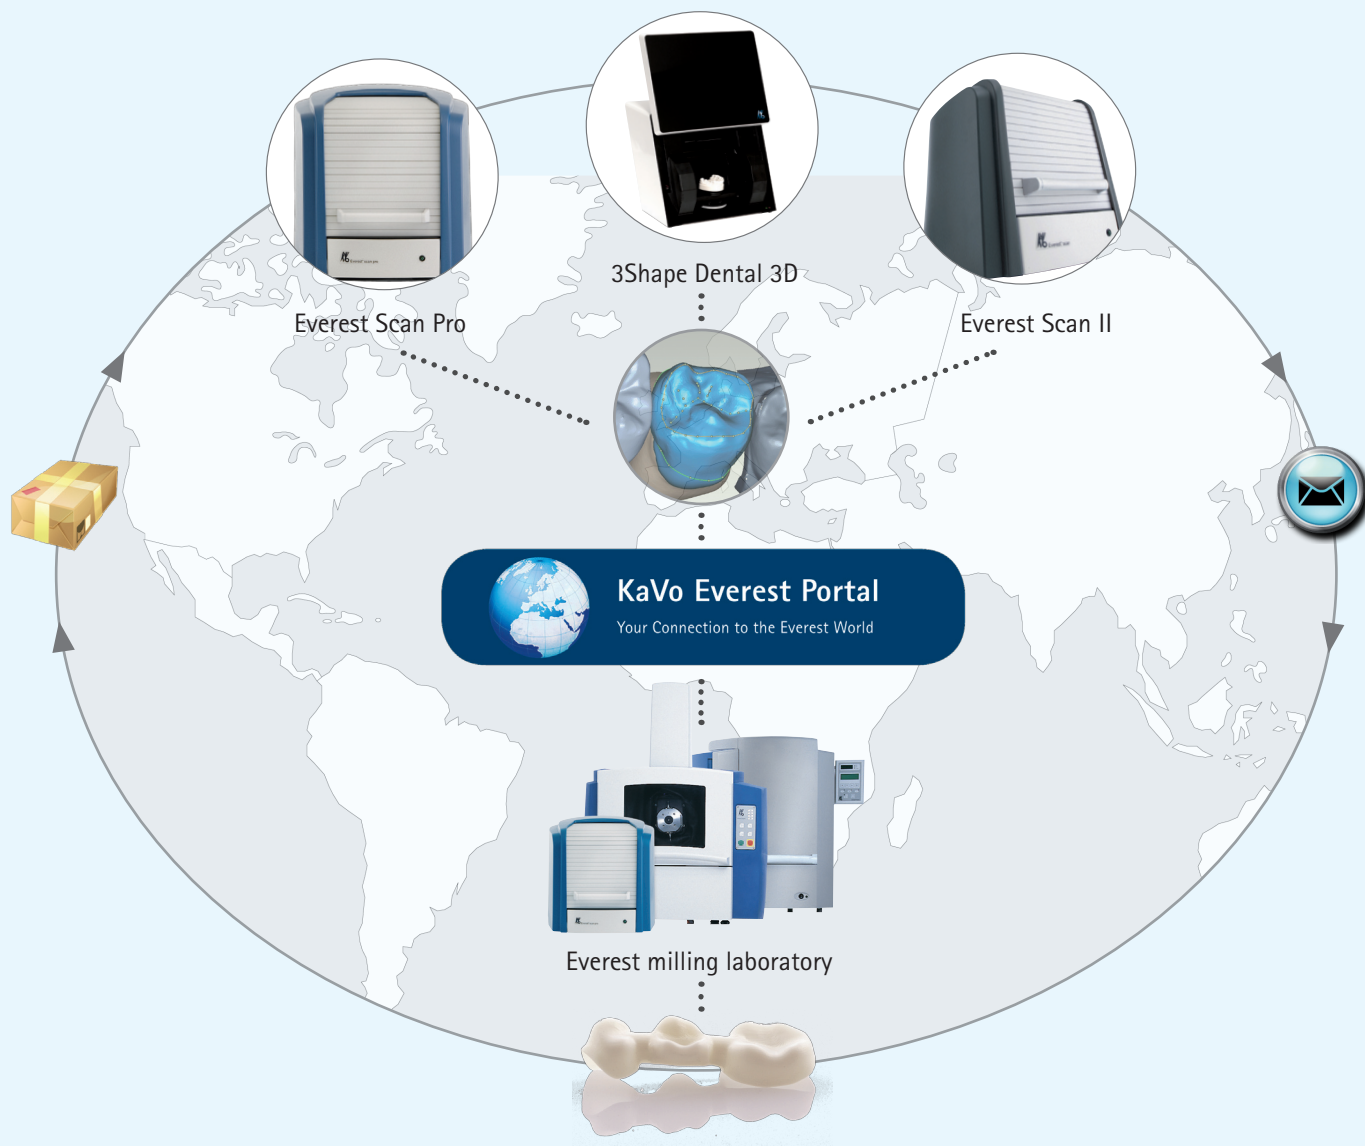

KaVo. Dental Excellence.

KaVo Everest portal

Whether you work with the 3shape Scanner, Everest Scan II or with Everest Scan Pro – the Everest portal enables you to exchange construction data with milling laboratories.

The KaVo Everest portal as a worldwide exchange-platform for scan- and milling laboratories offers you the possibility to choose your favourite milling partner conveniently and to get your scan order manufactured. Bail out the variety of the Everest systems!
